Crane Logistic & Transport Expert

Explosion-proof Wire Rope
Electric Hoist

Specification

YUANTAI CRANE

Everything is for Customer-Yuantai Crane

Henan Yuantai Crane Machinery Import&Export Co.,Ltd.

The machine features

- 1.1 Compact structure, light, safe and reliable;
- 1.2 High universality component, can be easily interchanged
- 1.3 Light dead weight, small in size, large lifting capacity
- 1.4 Explosion-proof type
- 1.5 Hoist exposed parts are all adopt special no-spark materials, reliable explosion-proof performance
- 1.6 Explosion-proof mark is Exd II BT4 or Exd II Ct4, temperature class is explosive gas mixture of T1-T4 group (see table 1 and 2)
- 1.7 Pass the explosion-proof performance testing of ministry of machinery industry explosion-proof electric products quality supervision and inspection center Jiamusi branch center, and presented the flame-proof certification
- 1.8 In accordance with GB3836-2000 planning and design, manufacture and acceptance

Our company mainly produce hoist series with the lifting capacity of 0.25-63t, the lifting height of $1\sim100$ m, low working class M3. We also design and manufacture non-standard series products according to your demands.

3 Ma

Main application

Hanging on the I beam; moving in straight or curve line; can be installed in the fixed support to lift the heavy materials, using with the explosion-proof single or double beam crane.

Mainly applicable to class B and C of type I and type II, places explosive dangerous with the temperature group of T1-T4.

Appendix

Explosive-proof grade

There are two types of electrical equipments using in prescribed conditions will not cause an explosive

hurning environment

Type I: electric equipment in underground coal mine

Type II: all others explosive environment using electric equipment except underground coal mine

Part 1: Product Overview

Type II can be divided into IIA/ IIB/ IIC.

Table 1							
T1	T2	T3	T4	T5	T6		
450 ℃	300 ℃	200℃	135 ℃	100 ℃	85℃		

Table 2						
temperature group class	T1	T2	T3	T4	T5	Т6
II A	methane, toluene, methyl ester, ethane, propane, acetone, acrylic acid, benzene, styrene, carbon monoxide, acetic ether, acetic acid chlorobenzene, methyl acetate, ammonia	methanol, ethanol, ethyl benzene, propanol, propylene, butanol, butane, butyl acetate, amyl acetate,cyclo pentane	Pentane, amyl alcohol, hexane, hexanol, heptane, octane, ring ethanol , turpentine, naphtha, petroleum, (including gasoline), fuel oil, amyl alcohol tetrachloro	Acetaldehyde , trimethylamin e		ethyl nitrite
II B	Propylene, dimethyl ether, town gas	Butadiene, propylene oxide, ethylene	Dimethyl ether, acrolein, and hydrocarbon	diethyl etherethyl oxide		
II C	Hydrogen, water gas	Acetylene		carbon disulfide	ethyl nitrate	

Part 1: Product Overview

applicable scope and working conditions

This crane is used in ambient temperature of -25°C~+40°C, humidity≤85%, elevation under 1000m, power supply is 3-ph, 380V,50HZ (can change as user demand).

classification and product specifications

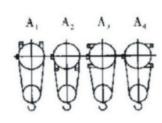

Explosion-proof single speed type and explosion-proof double speed type.

Note: single speed explosion-proof traveling electric hoist, with the capacity 5t and lifting height 9m, can be signed as BCD 5t-9m.

Structure Layout

Stationary type and operation type both included.

As shown on the right: A1、A2、A3、A4 separately fixed on the up, down, left and right side. A2 always used on the trolley of double beam crane with hoist. It is usually operation type without special explanation, traveling along with beams.

1

Main structure and characters

7.1 Lifting mechanism

Lifting motor

- Adopt professional manufactured fully enclosed tapered rotor asynchronous explosion-proof series motor
- 2. Max torque is 2 or 3 times more than full-load torque, safe and reliable when using
- 3. Grade B or F insulation, motor protection degree IP44/IP54

- Ex emcta

Speed reduce

- Adopt standard module cylindrical gear, easy for maintainance, all installed antifriction bearing
- 2. The gears and gear shaft made with heat treatment alloy steel, high strength
- 3. High quality cast iron shell, shaped by machining center, assembly rigor, dust proof
- 4. Reducer is a separate part, convenient for assemble and un-assemble.
- 5. Reliable driving, high efficiency

Part 1: Product Overview

Hook

- 1. Hook end uses card board type structure
- 2. When explosion-proof degree is DIIT4, hook head made of stainless steel.

7.2 Traveling mechanism

Traveling motor

- Flameproof BZDY series conical rotor three-phase asynchronous motor, the brake part is flat brake, the braking torque is small, the braking process is slow to avoid parking hanging heavy objects shaking.
- Motor working duty S4, benchmark load sustained rate of 25%,
 120 times equivalent starting per hour.

Wheels

Explosion-proof handled wheel

7.3 electric equipment

- 7.3.1 Composed with explosion-proof type electric control box, explosion-proof type control board and explosion-proof limiting stopper
- 7.3.2 With explosion-proof dedicated up and down traveling protection of fire stopper limit device
- 7.3.3 With explosion-proof type overload limit
- 7.3.4 With explosion-proof type overload limit

Note: mechanical components take explosion-proof measures. In order to prevent electric hoist crash and impact cause high temperature spark when traveling, we should deal with some relevant parts.

- (1) Lifting and running reducer should be injected right amount of machine oil.
- (2) Reel, wire rope coated with grease.
- (3) Stop block in the limited rod and joint of limit apply made with bronze or stainless steel.

Part 2: Parameter

BCD type explosion-proof electric hoist				3t				
Lifting speed nomal speed(slow speed)	m/min	8(0.8)						
Traveling speed	m/min	10						
Lifting motor	kw	4.5/0.4						
Traveling motor	kw	0.4						
Traveling rail		20a∼32c						
Lifting height	m	6	9	12	18	24	30	
Min curvature radius	m	2.0	2.0	2.0	2.5	3	4	
Dead speed(single speed)	kg	332	352	392	432	472	512	
Dead weight(double speed)		411	431	471	511	551	591	

BCD type explosion-proof electr	ic hoist		5t					
Lifting speed nomal speed(slow speed)	m/min	8(0.8)						
Traveling speed	m/min		10					
Lifting motor	kw	7.5/0.8						
Traveling motor	kw	0.8						
Traveling rail		25a∼63c						
Lifting height	m	6 9 12 18 24 30					30	
Min curvature radius	m	2.5 2.5 2.5 3 4.0 5.0					5.0	
Dead speed(single speed)		479	502	550	595	610	685	
Dead weight(double speed)	kg	617	640	688	733	778	823	

BCD type explosion-proof electric hoist					10t			
Lifting speed nomal speed(slow speed)	m/min	7(0.7)						
Traveling speed	m/min	10						
Lifting motor	kw	13/1.5						
Traveling motor	kw	0.8						
Traveling rail		25a∼63c						
Lifting height	m	6	9	12	18	24	30	
Min curvature radius	m	2.5	3.5	4	6	7.5	9.0	
Dead speed(single speed)	kg	794	914	1034	1234	1434	1634	
Dead weight(double speed)		1070	1190	1310	1510	1710	1910
